PETITION

Sir:

This petition is being submitted via facsimile and "Express Mail" in response to the Decision on .
Petition To Withdraw The Holding Of Abandonment mailed March 17, 2004, which is in
reference to the Decision on Petition To Withdraw The Holding Of Abandonment mailed
February 6, 2004 and the Notice of Abandonment mailed on October 21, 2003. Enclosed
herewith are the following:

- **Exhibit A** -- a copy of the original response bearing a signed Certificate of Transmission, which includes the date of signing; and

- **Exhibit B** -- a statement under 37 C.F.R. 1.8(b)(3) attesting to the personal knowledge of transmitting the original response on the date indicated on the Certificate of Transmission.

The Assistant Commissioner is authorized to deduct the petition fee (37 C.F.R. 1.17(h)) in the amount of \$130.00 from Schlumberger Technology Corporation Deposit Account No. 50-0457. The Assistant Commissioner is also authorized to deduct any other fees required for this petition from Schlumberger Technology Corporation Deposit Account No. 50-0457.

If the petition is granted, please refund the petition fee to Schlumberger Technology Corporation Deposit Account No. 50-0457.

Applicant respectfully requests reconsideration, that the application be reinstated with its original filing date of November 19, 2001 and that the petition fee be refunded.

Respectfully submitted,

Application Serial Number 09/992,681. [Our Ref: 68.0176US]
(2 pages)
2. Authorization to charge any fees to Deposit Account No.

Art Unit: 3672

Group is not required for another Group, restriction for examination purposes as indicated is proper.

4. This application further contains claims directed to the following patentably distinct species of the claimed invention: the species of figures 2-12; the species of figures 13-14; the species of figures 13-14; the species of figure 15; the species of figures 16-17; the species of figure 18; the species of figures 20-21

Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3672

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 703-308-2149. The examiner can normally be reached on 9:15-5:45 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Bagnell can be reached on 703-308-2151. Dear Sir:

In response to the restriction requirement mailed on March 17, 2003, the Assignee elects the claims of Group I (claims 1-20, 31-56, and 61-81) and the species of Figures 2-12 without traverse. Claims within Group I and readable on the elected species are claims 1-5, 7-8, 10-15, 17-18, 20, 31-56, 61-62, 64-68, 70-78.

The Commissioner is authorized to pay any additional fees or credit any overpayment to Deposit Account No. 50-0457.

Respectfully submitted,

3/26/03

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, 31-56 and 61-81, drawn to a system or method usable with a subterranean well, classified in class 166, subclass 250.001.
 - II. Claims 21-30, drawn to a resistivity tool, classified in class 324, subclass 352.
 - III. Claims 57-60, drawn to a method of establishing fluid communication between an exterior of a casing and its interior, classified in class 166, subclass 297.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the detailed structure of the resistivity tool (e.g., transmitter, receiver, circuit) of Group II or the piercing of the casing of Group III are not required by the combination claims (e.g., see claims 1, 11, 75, 79). The subcombination has separate utility such as a tool for measuring resistivity having no packer or/and puncher (Group II) and a method for producing a well wherein the communication between the exterior of the casing and its interior thereof is for the purpose of production.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for one

Art Unit: 3672

Group is not required for another Group, restriction for examination purposes as indicated is proper.

4. This application further contains claims directed to the following patentably distinct species of the claimed invention: the species of figures 2-12; the species of figures 13-14; the species of figures 13-14; the species of figure 15; the species of figures 16-17; the species of figure 18; the species of figures 20-21

Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3672

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 703-308-2149. The examiner can normally be reached on 9:15-5:45 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Bagnell can be reached on 703-308-2151. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3597 for regular communications and 703-305-3597 for After Final communications.
